TRAINING & DEVELOPMENT

Free Learning and Development Forum

The Independent Medical Examination (IME)

If you would like to:

- Understand how an IME is conducted
- Receive a list of questions to help you address specific concerns during your client's assessment
- Learn strategies to gain more from the IMEs you request
- Observe a mock IME with a medical specialist learning how the medical history is obtained and the medical assessment conducted

Then attend this dynamic 90 minute training session that includes:

- A review of IME reports, explaining key terminology found in reports, and how to extract information from them
- You will be provided with a resource pack that includes valuable information on the medical specialties and tools to assist in the interpretation of the report
- A brief tour of mlcoa's consulting rooms, meeting our staff and following the process of your IME request through the system

Schedule of dates and times: (additional sessions will be arranged on demand)
